

Hounslow Wheelchair and Posture Management Service

Sleep systems

We now offer sleep systems to local children and adults in Hounslow, as part of a 24 hour postural management to your service users.

Research has shown that sleep systems provide:

- Management or prevention of pressure ulcers in bed
- Postural management and improved comfort during sleep
- Improved sleep quality for those using the sleep systems
- Increased sleep for carers due to the improved sleep of their family member.

Refer to our service if your service user requires:

- Long term complex postural management e.g. contractures, deformity, asymmetric posture either developing or present.
- End of life care e.g. for posture management and comfort.
- Pressure management / care to assist in preventing the development of pressure ulcers or as part of the healing process.

Hounslow Wheelchair and Posture Management Service

What we provide

- An assessment service for sleep systems, posture management and mobility with our multi-disciplinary team.
- Prescription and provision of sleep system equipment from our dedicated budget, with no cost to your service.
